

# [PHP + MySQL] 게시판 구현

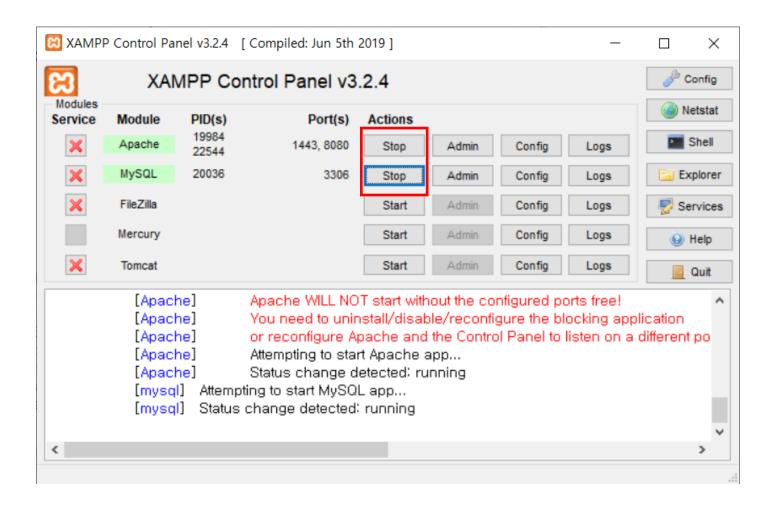

20200720 이유경

#### 목차

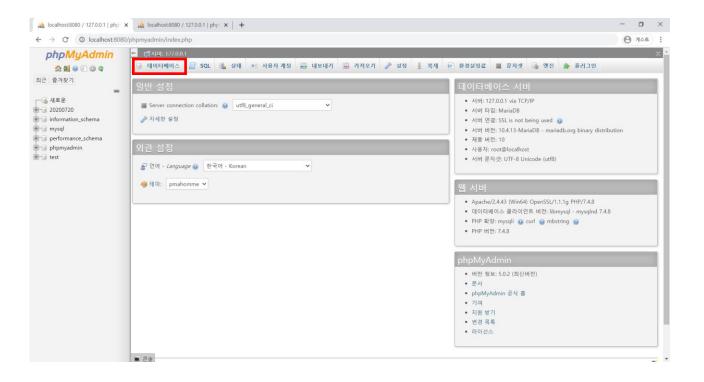

- DATABASE 설정
- 게시판 구성/구조
- t\_index.php
- t\_write.php
- t\_write\_ok.php

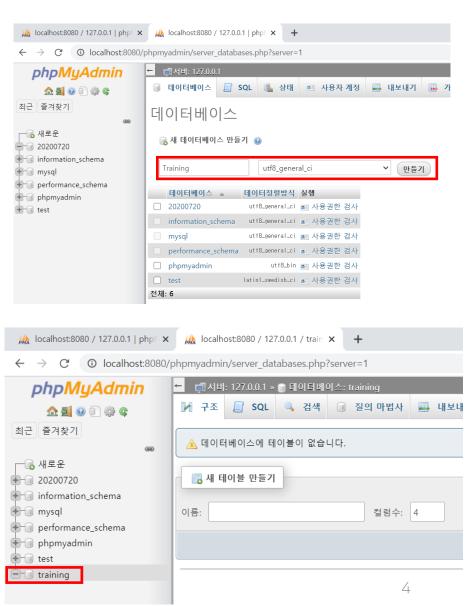

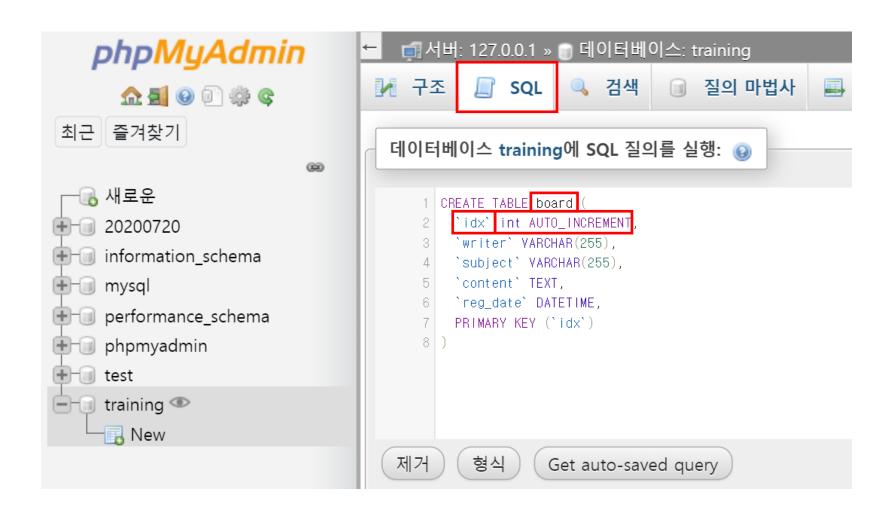

http://localhost:8080/phpmyadmin/http://127.0.0.1:8080/phpmyadmin/

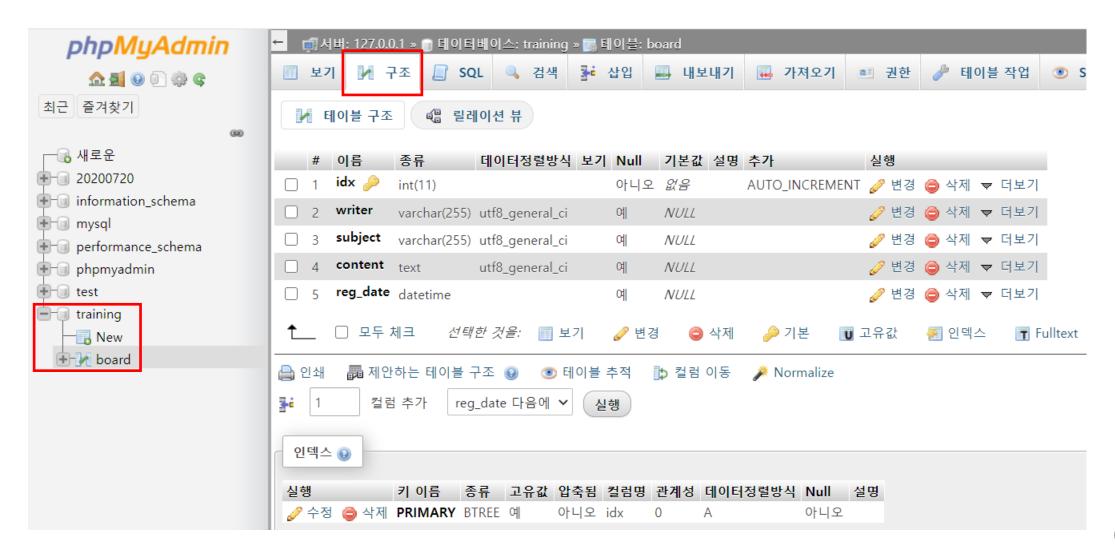

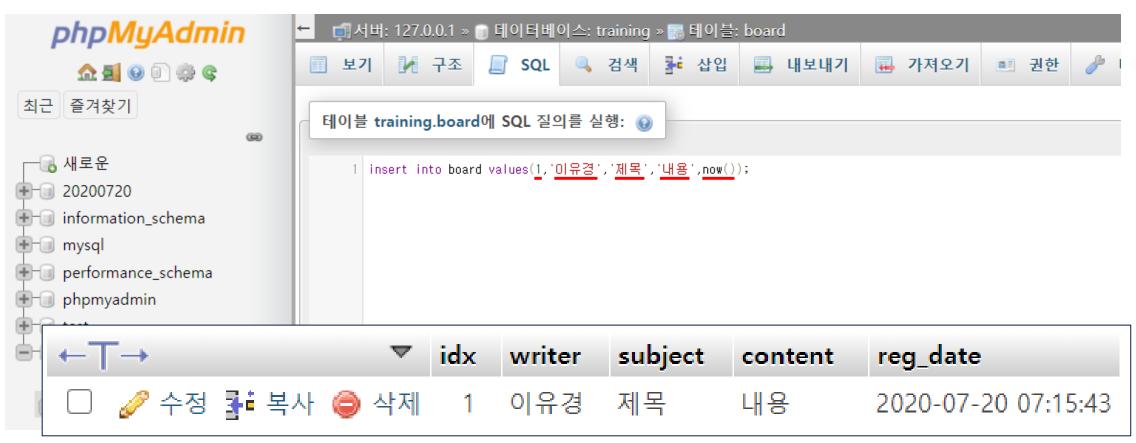

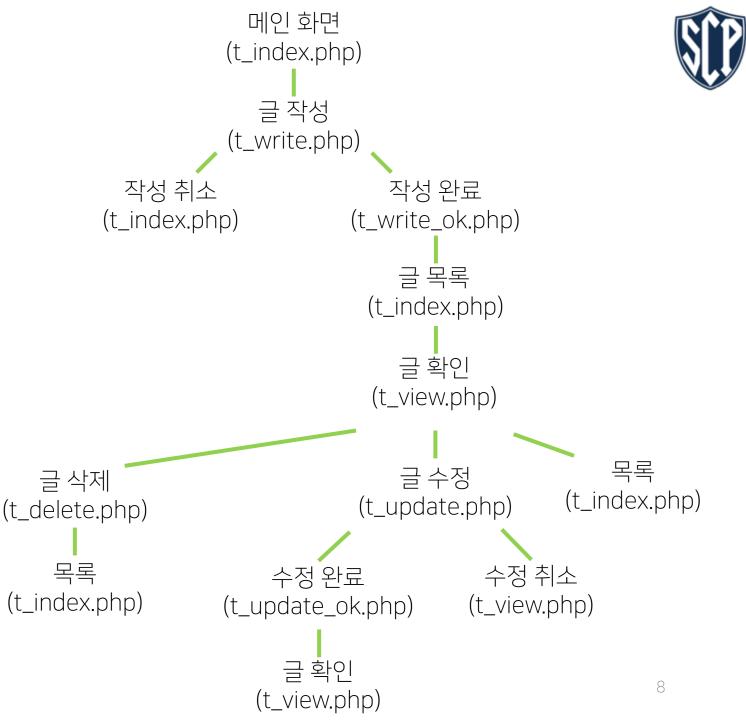

#### 게시판 구성/구조

- t\_index.php
- t\_write.php
- t\_write\_ok.php
- t\_view.php
- t\_update.php
- t\_update\_ok.php
- t\_delete.php

# t\_index.php

```
DB 연결
   $db = new PD0("mysql:host=127.0.0.1;dbname=training;charset=utf8","root","1234");
4 <!DOCTYPE html>
5 <html lang="en">
6 <head>
     <meta charset="UTF-8">
     <title>게시판</title>
9 </head>
10 <body>
     >
                                                                                     글작성 버튼 누르면 t_write.php로 이동
        <a href="./t_write.php">글작성</a>
                                                                                              $db: database에 대한 정보를 갖고 있음.
                                                                                              query: 쿼리 명령어 실행
        $rows = $db->query("SELECT * FROM board")->fetchAll();
        foreach ($rows as $row) {
                                                                                              fetchAll: 일치하는 모든 데이터 가져옴.
        <
           <?php echo $row['idx'] ?> /
                                                                                             글 목록에서 조회할 수 있게 글제목에 링크를 걸어 둒.
           <a href="./t_view.php?idx=<?php echo $row['idx']?>"><?php echo $row['subject'] ?></a> /
           <?php echo $row['writer'] ?> /
                                                                                             링크는 t_view.php?idx= 뒤에 글의 인덱스 번호가 옴.
           <?php echo $row['reg_date'] ?>
        <?php
     31 </body>
32 </html>
```

## t\_write.php

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
      <meta charset="UTF-8">
      <title>게시물 작성</title>
6 </head>
7 <body>
     <form action="./t_write_ok.php" method="post">
     i>
          <label>
           제목
           <input type="text" name="subject">
         </label>
        <label>
            작성자
           <input type="text" name="writer">
         </label>
        <label>
           <input type="text" name="content" size="80">
         </label>
        <button type="submit">완료</button>
         <button type="button" onclick="location.href = './t_index.php'">취소</button>
      </form>
32 </body>
33 </html>
```

action="./write\_ok.php": <button type="submit">완료</button> 를 클릭할 경우 form에 정의한 write\_ok.php 에 입력한 내용을 전송함.

Javascript를 이용하여 t\_index.php로 이동함.

## t\_write\_ok.php

```
<?php
                                                                                          DB 연결
    $db = new PDO("mysql:host=127.0.0.1;dbname=training;charset=utf8","root","1234");
    $sql = "
      INSERT INTO board SET
      subject = '{$_POST['subject']}',
      writer = '{$_POST['writer']}',
                                                                                          쿼리문 작성
      content = '{$_POST['content']}',
      reg_date = now();
10
                                                                                          쿼리문 실행
   if ($db->query($sql)) {
12
      header('Location:./t_index.php');
13
    } else {
14
      print_r($db->errorInfo());
15
```
